Study Methodology

The goal of this analysis was to discover ways in which virtual office solutions impacted small law firms, and solo and freelance attorneys. Extant literature was reviewed for relevant content. Findings were presented in the linked literature review article with references presented in this document.

The literature review was conducted by an experienced academic librarian by searching out both scholarly and popular sources for statistics on solo, freelance, and small firm lawyers. Research topics were sought out regarding the use of virtual assistants, shared office spaces, client demographics, earnings, wellbeing, and other related information.

This study is highly relevant, as it is associated with one of our largest client bases and as such encompasses a wide range of data points.

Starting a Virtual Law Practice Can Save \$250K/Year
